VETTER ProV WOOD WINDOWS DELIVER WARMTH OF WOOD INTERIORS, EASE OF VINYL EXTERIORS

MOSINEE, Wis.—ProV Wood windows and patio doors from Vetter® Windows & Doors could be the perfect choice for time-crunched, discriminating homeowners. The product line features vinyl exteriors that require virtually no maintenance and natural wood interiors that provide warmth and character to a home's interior. Consider the available options and flexibility for custom shapes and sizes and the product line has great appeal to architects and designers as well.

“The ProV Wood product line is increasingly popular with architects, designers and homeowners,” said Jeff Kibler, Vetter brand manager. “The basic composition of the products – the vinyl exteriors and wood interiors – solve the ongoing challenge of choosing wood windows for their warmth and beauty or choosing vinyl windows to save maintenance headaches. ProV Wood windows are also very energy efficient because of the warm-edge glass technology, multiple weather strips and choices in high performance glazing.”

The standard frame on ProV Wood products is 4-9/16"; sashes are 1-7/8" with fusion welds at the seams for strength and durability. The PVC exteriors, in either White or Sandtone, have titanium dioxide stabilizers to help preserve the color while high impact acrylic modifiers minimize denting and scratching. Interiors can be ordered in

(more)

standard pine, or ash, or if a no-maintenance interior is preferred, a prefinished white composite interior also is available. The pine or ash interiors come ready to stain, or can be prefinished at the factory in one of four stain finishes: Cinnamon, Clear Satin, Fruitwood or Golden Oak.

The ProV Wood product line includes double hung, casement, awning, bow and bay, and fixed windows, and hinged and sliding patio doors. Extensive specialty shapes and sizes are also possible in ProV Wood.

ProV Wood casements feature a single split-arm operator and a single throw, multi-point lock system. Double hung units have a block-and-tackle balance system and easily tilt in for cleaning.

ProV Wood windows and patio doors can be enhanced with Grilles in Airspace (GIA), Value Divided Lites (VDL), Optically Divided Lites (ODL), and Removable Full-Surround Wood Grilles.

A 3/4" insulated glass with warm edge high-performance glass technology is standard on all ProV Wood windows and patio doors. Other glazing options include: HiPro4™ Low-E², EasyCare™ HiPro4 Low-E², SunPLUS4™ Low-E², argon in the airspace, high-altitude, tempered, obscure, gray or bronze tinted, or sound control glass.

Vetter has been manufacturing millwork products since 1892. Based in Mosinee, Wis., the company manufactures architecturally inspired wood windows and patio doors, as well as vinyl windows and patio doors. Products are sold nationwide through building materials dealers. For more information about Vetter's complete product line, visit www.vetterwindows.com or call 800/VETTER-2.
